

Webinar training on Desert Locust Management and improved horticulture crop production technologies

On the eve of World Environmental day celebration, the ICAR KrishiVigyanKendra in association with ICICI foundation organized a one day webinar training on desert locust management practices and improved horticulture crop production technologies on 5th June 2020 at the KVK premise.

Shri.K.Sathish, Executive officer, ICICI foundation on his introduction speech lauded the KVK for accepting the webinar training for the benefit of farmers and he also informed the farmers that these kind of trainings will continue with the help of KVK time to time.

Shri.N.Rameshraj, Senior Scientist and Head informed the farmers that these kind of online trainings will definitely help the farmers to overcome their problems amidst the COVID 19 pandemic situation. He explained with power point presentation about the improved horticultural crop production technologies starting from nursery management practices, seed availability, seed treatment practices, water and nutrient management practice and marketing of the produce.

Shri, P.Narayanan, Subject Matter Specialist (Plant Protection) explained in detail about the desert locust management practices with ppt presentation. He also interacted with the farmers about the pest and disease management practices to be followed to minimize the cost on pesticides.

A total of 103 farmers, farm women and rural youth from Thiruvannamalai, Cuddalore, Villupuram, Kallakurichi, Nagapattinam districts had participated in the programme.
